Data processed from the PHE National Child Measurement Programme, as released at MSOA geography for England. CDRC has mapped the data for Year 6 cohort children (aged 10-11) recorded as being obese. The measurements were taken during the school years 2013-14, 2014-15 and 2015-16, referred to simply as "2016" in the record/map. A comparison with the same measurements for Year 6 in school years 2008-09, 2009-10 and 2010-11. Broadly speaking, this can therefore be compared to show the change across a five year interval.
